| 2.93               | 17.85               | 16.43                    |

Revenue vs Net Profit (10 Years)

ROE vs Debt-to-Equity

## Pros

- Revenue growing above 15% CAGR over 5 years reflects strong business momentum.
- Operating profit margin above 25% indicates strong pricing power and cost discipline.
- Revenue growth outpacing profit growth indicates improving operating leverage potential.

## Cons

- Debt-to-equity ratio of 2.93 is elevated and warrants monitoring.
- Operating margins declining for three consecutive years suggest pricing or cost pressure.
- Borrowings have increased for three consecutive years, indicating rising leverage.
- Earnings per share declining for three consecutive years reflects weakening profitability.
